### FALL MEETING COMMITTEE

Chair: Tim “Deuce” Patterson – Carbon Partners, Inc.

Chair: Sara Schryer – CSX Transportation

Co-Chair: Michael Shinn – Dominion Energy

## CONGRATULATIONS 2025 GOODWYN HOLMES AWARD WINNER

### BOB HODGE

## SPEAKER SPOTLIGHT

Michelle Bloodworth, America's Power

Michelle Bloodworth is President and Chief Executive Officer of America's Power. Bloodworth represents coal electricity and its supply chain before Congress, state and federal regulatory agencies, and the Administration and sets the association's strategic agenda. America's Power is the only national trade association whose sole mission is to advocate at the federal and state level on behalf of coal-fueled electricity and the coal fleet, responsible for supplying sixteen percent of U.S. electricity needs.

Before becoming President and CEO in 2018, Bloodworth served as Chief Operating Officer for America's Power. In the past, she served as Executive Director of External Affairs for the Midcontinent Independent System Operator (MISO); Vice President of Business Development and State Affairs for America's Natural Gas Alliance (ANGA); and Vice President of Marketing, Sales, and Communications for Energen/Alabama Gas Corporation. She began her career as a power plant engineer after graduating with a Bachelor of Science in Mechanical Engineering from Auburn University.

Over the last two decades, Bloodworth has worked with groups focused on utility, electricity markets, regulatory policies, and state affairs. Due to her expertise in the energy industry, she continues to serve as a resource for national groups, publications, state legislatures, and federal agencies on issues related to wholesale markets and regulatory policies impacting the coal fleet and the coal supply chain. She has recently participated in both PJM, and the North American Electric Reliability Corporation's (NERC) fuel security initiatives and now serves as the Vice-Chair of the Affiliate Sector of MISO's Advisory Committee, where she is actively involved in discussions around the reliability and resilience of the electric grid and market reforms within MISO. She was instrumental in the formation of two national trade organizations and currently serves on the board of directors at the Keystone Policy Institute and is a member of the United States Energy Association.

## SPEAKER SPOTLIGHT

Morgan Snook, S&P Global

Morgan Snook is a Platts Price Reporter, S&P Global Commodity Insights specializing in thermal coal and petroleum coke markets at S&P Global Commodity Insights. With a focus on US domestic and export coal markets, she delves into the fundamental factors that shape pricing dynamics. Morgan earned her BA in English Language and Literature from the University of Chicago in 2010, beginning her career in energy journalism shortly thereafter at a Pennsylvania newspaper, where she reported on Marcellus Shale natural gas development.

In recognition of her reporting, Morgan received a Keystone Media Award in 2021 for her coverage of her local court system. She joined S&P Global in 2021, where she tracks US thermal coal pricing movements through price assessments, commentary, and breaking news. Her deep understanding of Platts methodology, coupled with her passion for pricing news, fuels her analysis of the US thermal coal landscape and its interconnected markets.

Morgan is currently pursuing a Master of Science degree in Energy Policy and Climate at Johns Hopkins University. In her presentation at The Coal Institute Summer Meeting, she will provide an overview of the current state of the US spot coal market, with an emphasis on pricing impacts and drivers. Additionally, she'll explore relevant energy policies and examine how prices have reacted to contemporary events, including impacts from new forces like data centers and climate change. Morgan is excited to share insights that will help attendees navigate the evolving coal markets.
